General

- Continuous Integration
- Collaboration

Projects

ShareTheSun Dashboard (my.completesolar.com) - Complete Solar's customer-facing web application, allowing logged-in users to view system information, related documents, and monitor the kWh production of their solar system. Using PHP, JavaScript/jQuery, Bootstrap, Charts.js and Enphase's production data API.

HelioTrack Jobs (heliotrack.completesolar.com) - Internal-facing CRM web application for Complete Solar's sales team, account managers and Operations department to coordinate and manage jobs throughout the sales process. Built using PHP, JavaScript, jQuery, Bootstrap, and various JavaScript libraries.

Acquaintly (acquaintly.herokuapp.com) - Collaborative project: a social Contact Relationship Management, mobile-first web application. Built with Ruby on Rails and AngularJS, using OAuth with the LinkedIn API.

Experience

Complete Solar, Foster City, CA - Front End Developer, 7/7/2014 - 6/5/2015

- Developed fast and responsive internal and customer-facing applications, some handling large libraries of data. Languages/libraries used include PHP, JavaScript, jQuery, Bootstrap, and Java.
- Researched and implemented a test-driven design/development process, and set up a continuous integration & automatic deployment service using Travis CI and GitHub Webhooks.
- Collaborated with development team and Marketing department for design and development.

Soma Beverage Company, LLC, San Francisco, CA - Operations Coordinator, 5/2012 - 4/2013

- Managed operations department: inventory balance/management, inventory reconciliation, coordination with various 3rd-party entities for purchase order fulfillment, submitting production orders.

Education

General Assembly, San Francisco, CA - Web Development Immersive course, March 2014

San Francisco State University, San Francisco, CA - B.S. in Accounting, May 2010
